PROFESSIONAL SUMMARY

Frontend Web Developer and Graphic Designer with experience designing and developing responsive websites, intuitive user interfaces, and engaging digital experiences for nonprofits, healthcare organizations, educational platforms, and businesses. Skilled in HTML, CSS, JavaScript, responsive design, WordPress, Git, GitHub, and Adobe Creative Suite. Passionate about creating accessible, high-performance websites that combine strong visual design with excellent user experience while continuously expanding my expertise in modern frontend development.

Experience

2024 - present

Freelance Frontend Web Developer & UI Designer

Remote

- Designed and developed responsive websites for nonprofit organizations, healthcare providers, educational platforms, churches, and small businesses.
- Built modern user interfaces using HTML5, CSS3, and JavaScript with a focus on accessibility, responsiveness, and performance.
- Developed and deployed multiple web projects, including nonprofit, healthcare, education, and faith-based websites.
- Optimized websites for mobile devices and different screen sizes.
- Managed source code and project workflows using Git and GitHub.
- Collaborated with project requirements, UI design, testing, deployment, and maintenance processes.

Selected Projects: ImpactConnect • Lifegate Specialist Hospital • ExamUploads • Godly Stories

2023 - 2024

Jethrone Hospital & Diagnostic Centre

HMO Officer / Administrative Officer

- Managed patient registration and administrative records.
- Coordinated HMO documentation and healthcare processes.
- Maintained accurate patient information and improved administrative workflow.
- Assisted with daily hospital operations and customer service.
